

**The following are the expected outcomes of our Biokinesiology program.**

Graduates will

1. Investigate the fundamental mechanisms of human movement in order to discover better ways of maintaining physical health throughout the lifespan as well as to improve therapeutic interventions for individuals with movement dysfunction.
2. become independent scientists in leading academic and clinical laboratories across the world.
3. bring together basic, applied and clinical researchers with the goal of improving the health and wellness of individuals and society through movement, exercise and rehabilitation.
